SUMMARY

Detail-oriented **Backend Developer** with strong foundation in server-side technologies and database management. Experienced in building scalable applications with Node.js and Express. Skilled in implementing efficient data structures and optimizing database operations.

CERTIFICATIONS

NVIDIA Gen AI LLM Associate - NVIDIA

Oct 2024

- Proven ability to design, deploy, and optimize generative AI & LLMs using NVIDIA's advanced tools & frameworks.
- Expertise in GPU-accelerated model training to enhance AI performance, fine-tuning, & inference workflows.

WEB DEVELOPMENT BOOTCAMP - Udemy

Oct 2022

- 62+ hours of Fullstack development modules including HTML5, CSS3, Javascript, Node.js, MongoDB and React.
- Built 16 full-fledged websites.

FUNCTIONAL SKILLS

- HTML, CSS, Javascript, Typescript, jQuery, mySql, MongoDB. • **Tools:** Visual Studio, Figma, Jira, Jest.
- **Frameworks:** ReactJs, Redux, Node js, Express.js, Flux. • SDLC's: Agile (Scrum) • **Build Tools:** Git, Github
- API design and integration. REST APIs, working with JSON data. Database Management - CRUD operations. Version control & collaboration. Testing and Debugging. Performance optimization.

PROJECT EXPERIENCE

WEDDING WISE - [APP LINK](#)

- Tech Stack: Node.js, Express, MongoDB, RESTful APIs
- Description: Backend system for wedding event management platform
- Outcome: Successfully handled complex data relationships and concurrent user sessions

KEEPER - [APP LINK](#)

- Tech Stack: Node.js, Express, MongoDB
- Description: Server-side implementation for note management system
- Outcome: Built scalable backend supporting multiple users with efficient data storage

PROFILE DECK - [APP LINK](#)

- Tech Stack: Node.js, Express, MongoDB, REST API
- Description: Backend service for profile management system
- Outcome: Implemented efficient data retrieval and search functionality

PROFESSIONAL EXPERIENCE

GRAVVITY

Software Developer

Toronto, ON

Apr 2023 - June 2024

- Engineered robust backend services using Node.js and Express, supporting high-traffic e-commerce operations
- Implemented efficient data models and API endpoints, improving overall system performance by 30%
- Designed scalable database schemas and optimized queries, enhancing data retrieval speed

VANKAY SYSTEMS

Frontend Developer Intern

Raleigh, NC

Jan 2022 - Dec 2022

- Developed and maintained RESTful APIs serving data to frontend applications
- Implemented secure authentication and authorization systems using industry best practices.

EDUCATION

UNIVERSITY OF GUELPH

Guelph, Canada

Bachelor's in Computing

2022

- **Core Courses** - Data Structures and Algorithms, Database Management Systems, System Design and Analysis
- UoG Entrance Scholarship of \$13000 for outstanding academic achievement.
- Teaching Assistant - Introducing to Computing - C programming.
